

# WINDSORONE

## TRADITIONAL BOARDS

**Gold indoor air quality rating and low VOC's**  
Because why wear a respirator in your house?  
That is so 1980's.

**Minimizes the natural tendency to distort**  
Unlike the explanation your 16 year old gave  
about how the family car ended up in the pond  
out on Route 1.

**No knots; your boards are always clear**  
Imagine that, you can actually use every foot  
you pay for.

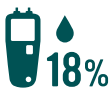

**Build America: Manufactured in the U.S.A.**  
Because everything else you bought was made  
in China.

**Prime all cuts**  
The easiest thing you can do to ensure  
your project looks good for years to come.

**Store on stringers, and out of weather.**  
Material should be  $\geq 12$ " off the ground. Keep  
covered if outside & allow air flow underneath.

**Install dry material**  
On the exterior, do not install trim boards with  
a moisture content over 18%.

**Acclimate to the environment**  
For interior trim, store inside the structure  
until the products reach approx 8% moisture  
content. For exterior trim, store in locations  
such as a garage that is not heated and is well  
ventilated. For more information please visit  
[www.windsorone.com/moisturecontrol](http://www.windsorone.com/moisturecontrol)

---

*WindsorONE should be stored, installed, handled & maintained correctly  
for the best performance. For **full installation instructions** and more info,  
please visit [www.WindsorONE.com](http://www.WindsorONE.com) or call us at 888.229.7900.*
